# HANDCRAFTED WOOD ART

retro

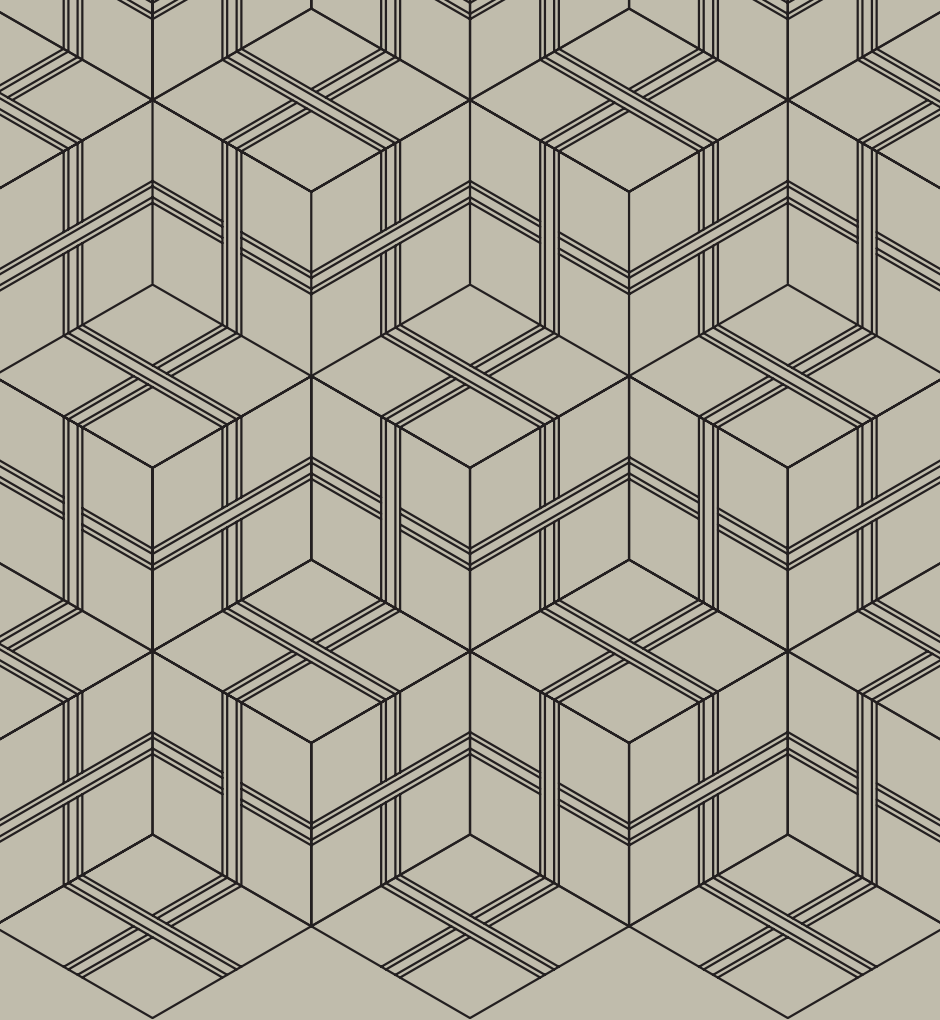

## about us

Retro Flooring, with its high quality production at its new 11,000 m<sup>2</sup> factory in Ankara, aims at high customer satisfaction by offering a wide range of flooring solutions in marquetry and parquet. Combining the world's most precious woods together with their original Retro Flooring provides the perfect harmony of craftsmanship and technology to achieve high standards with it's increased capacity to 120,000 m<sup>2</sup> per year, updated machinery and equipment provide Retro Flooring a timely and excellent production.

Starting with the production of aesthetically pleasing parquet flooring, today Retro Flooring is constantly expanding its production range from classic motifs to modern lines in collaboration with international designers.

Retro Flooring exports to more than 20 countries worldwide, has accomplished many qualified projects at home and abroad. Focusing on new trends and quality, Retro Flooring presents very wood...

# VERY WOOD

Every parquet carries the history of years. It comes to life in homes, offices and spaces with its history. Trees that once grew and developed in a green forest into parquets that beautify people's lives, giving them warmth and quality. This magnificent story of real trees turning into parquet is a work of art created by man and nature.

retro

# SKILLFUL TOUCH TO WOOD

Retro Flooring, which brings the elegance of nature to interiors, adds a special touch to your spaces by combining aesthetics and durability. The unique naturalness of oak and walnut meets in Retro's handmade parquet. Each piece is literally designed and produced as a work of art. Retro's original designs and skillfully crafted details add warmth and aesthetics to your space, while providing durability with its quality materials.

# reborn

Nature breaks out of the  
silence of the forest and  
comes back to life in your  
living spaces. You will  
feel the elegance and  
vitality of nature and  
encounter with a natural  
touch every step you take.

Grade **AB**  
Surface **Standard**  
Dimension **Square 800/1000 mm**  
Color **AQ-215**

## Cappa & Docia

On a recent trip to Cappadocia, I was inspired by the beautiful organic shapes found in the stunning rock formations. When designing Cappa and Docia my first goal was to create timeless designs with a refined elegance that are easily customizable allowing for endless possibilities. My second goal was to create designs that celebrate natural organic shapes that evoke the natural patterns and textures found in wood.

Cappa and Docia exemplify a rational yet organic approach to design that conveys a sense of serenity, balance, and space.

## Emma Robson | Designer

Emma Robson grew up in Cape Town, South Africa, studied at Parsons School of Design in New York, and now lives and works in the US. Emma is a commercially astute and solution-orientated interior and product designer with over two decades of experience. She has established a reputation as a highly collaborative creative ability to adapt to different briefs and deliver successful outcomes for both the manufacturer and product user.

Central to her role is understanding how the workplace and hospitality environments are evolving and translating this into new and better product designs. Accelerated digitalization, a greater focus on sustainability, creating a more collaborative environment for an increasingly diverse team are just some of the trends workplace designers need to understand and embrace.

Emma's approach is to combine innovative forward-looking design with a focus on quality, sustainable manufacturing, and commercial requirements. By working closely with manufacturers, she understands her products holistically, from their engineering, builds, placement, use, and life expectancy to ensure expectations are met and usually exceeded.

## **Esat Fişek** | Designer

Graduating from Bilkent University Department of Interior Architecture and Environmental Design in 1999, he continued his master's studies at the University of Central England Department of Industrial Design. He is currently both interior architecture and product design in his own company, Esat Fişek Interior Architecture, which he founded in 2001.

Believing design can only be made with total peace in mind, his approach to design is about being out of ordinary, always pushing the boundaries, and most of the time surprising to the audience. He has a wide range of designs made in a clever harmony although it may seem to have contradictions.

## **Eklekt, Diversa & Harmonix**

In this collection I designed for Retro Flooring, I created harmony by using contrasts and modern lines. These pieces, which are very contrasting and unique among each other, present a unique, endless visual cycle when brought together.
